

Spinner Balanced Salts, Eagle 1X

With Phenol red and Sodium bicarbonate
Without Calcium Chloride

Product Code: TL1011

Product Description :

All media used in tissue culture have a basis of a synthetic mixture of inorganic salts known as a physiological or balanced salt solution (BSS). All the physiological salt solutions have been derived from the salt solution originally described by Sydney Ringer (1885). The first balanced salt solution to be developed specifically for supporting the metabolism of mammalian cells was Tyrode's solution. Since then many modifications have been done to obtain better buffering salt solutions and to prevent calcium precipitation.

The function of a salt solution is:

- To maintain the medium within physiological pH range.
- To maintain intracellular and extra cellular osmotic balance.
- Modified with a carbohydrate, such as glucose serves as an energy source for cell metabolism.

TL1011 is Spinner balanced salts, Eagle with phenol red and sodium bicarbonate. It does not contain calcium chloride.

Composition :

Ingredients	mg/L
INORGANIC SALTS	
Magnesium sulphate anhydrous	100.000
Potassium chloride	400.000
Sodium bicarbonate	2200.000
Sodium chloride	6800.000
Sodium dihydrogen phosphate anhydrous	1220.000
OTHERS	
D-Glucose	1000.000
Phenol red sodium salt	11.000

Quality Control:

Appearance

Red colored, clear solution

pH

6.60 -7.20

Osmolality in mOsm/Kg H₂O

270.00 -310.00

Sterility

No bacterial or fungal growth is observed after 14 days of incubation, as per USP specification.

Toxicity test

Passes

Endotoxin Content

NMT 1EU/ml

Storage and Shelf Life:

Store at 15-30°C away from bright light.

Shelf life is 24 months.

Use before expiry date given on the product label.

Revision: 02/2019
